Assignment No. 2

Submission Deadline

The deadline for the submission of assignment is, **Monday night May 25th 2026, 12:00 AM** on CU Online. Late Submissions are not acceptable.

Class: BSE-4A

Session: Spring 2026

Course: Operating Systems

TOPIC: CPU Scheduling

Instructor: Dr. Sardar Khaliq uz Zaman

[CLO # 2]

Different operating systems employ various CPU scheduling algorithms to efficiently manage process execution. Discuss the types of CPU scheduling algorithms (e.g., FCFS, SJF, Priority, Round Robin, Multilevel Queue, etc.) implemented in different operating systems (such as Windows XP, Windows 8, Linux Ubuntu, Linux Mint, etc.). Provide examples of at least **20 different operating system versions**, describing the scheduling algorithms used in each and explaining why a particular scheduling approach is suitable for that specific system.

Important Instruction:

- Title page should NOT be attached. You can write your names, reg no in headers/footers.
- Use Arial font with 10 size and 1.5 line spacing. The text should be justified by margins as well.
- The assignments will not include any Page borders. The page margins would be of standard A4.
- Maximum page count must not exceed 3 pages.
- AI Generated assignments or copying from any external resource or from any other student will carry **0** marks.
- References should be cited properly in text and at listed the end of document where required.
